

At Gaudí Experience we are pleased to see you enjoy our facilities with a careful attention to the wellbeing and safety of our visitors and staff. That is why the following hygiene and safety protocols are applied:

- **Reduced capacity** to avoid overcrowding and to guarantee a **safe distance** of 2 metres, both in the projection room and in the museum area, except between people from the same family.
- The use of a mask is **compulsory**.
- **Hand sanitizer gel** placed in various locations.
- **Removal** of 4D projection water and air effects as per COVID-19 safety regulations.
- Increased cleaning and disinfection protocols:
 - o Cleaning of used chairs after each session.
 - o Disinfection of 4D glasses after use.
 - o Ventilation of the projection room between sessions.
 - o Use of gloves to handle the touch screens, which are disinfected several times a day. We will supply you with gloves and hand sanitiser to make your visit safer.
 - o Closure of the bathrooms, which can only be used if necessary and with subsequent disinfection.
